

stoneandsteel

Your vision realized

We are Stone and Steel.

Our approach is to listen and collaborate, design and develop. One partner – one seamless process, which makes us the ultimate solution for architects, designers and building owners.

"We're the yes place."

Randy Gallob, President/Chief Creative Officer

One partner. One seamless process.

One-stop shop is a cliché, and we are not big on clichés. We handle every step of the project from architectural drawings to material sourcing to logistics, build-out and certification. The result is a simplified, seamless execution.

Design and Develop

This *and* is pure Stone and Steel, because it reflects the unique integration of our design and architectural specialists. Our design space was built specifically for those two teams to become one, to work side-by-side literally and figuratively, and to provide the ultimate in form and function.

Communicate and Collaborate

The first, most important part of collaboration is listening. Which is why every project starts with a conversation. Hearing you articulate your vision first hand is crucial, because that is what we build on.

Build and Deliver

There is nothing sweeter than building something that fits perfectly into your designs. We pride ourselves in our ability to help you meet the certifications required to ensure your designs are built to code and designed to last. It is literally a fitting end to a meticulous and rewarding process.

Our work speaks for itself

With Stone and Steel every element of your vision is covered from inception to final execution. Check out some examples of our contribution for premier installations around the country.

Credenza
One solid piece of stone completes the conference room credenza.

Conference table

Stone and Steel worked with The Stone Collection to design and build this totally unique conference table. We were the one source for the stone, the beveled wood perimeter trim and the support base.

The Stone Collection — Mesa, AZ

Stone and Steel partnered with The Stone Collection to help them build a state-of-the-art showroom at their brand new distribution center in Phoenix, Arizona.

Working with stone selections from around the world, Stone and Steel created tables, benches and counter tops that help define the endless possibilities for the materials available at The Stone Collection.

Morimoto — Waikiki, HI

When Chef Masaharu Morimoto, of Iron Chef fame, was developing the concepts for his new restaurant in bustling Waikiki, he came to Stone and Steel to help him create the ultimate dining experience. Stone and Steel built elaborate tabletops using custom resin compounds to embrace Morimoto’s vision of a unique design aesthetic.

Architectural products

Custom resin compounds were formulated to suspend organic elements within the elegant tabletops and host stand.

Lexington Social House – Los Angeles, CA

When the Lexington Social House opened, it quickly became one of Los Angeles’ premier dining and entertainment destinations. Lexington Social House reached out to Stone and Steel to further elevate their interior design strategy with custom products and solutions.

Stone lounge tables
Modern stone lounge tables were crafted with clean form and organic materials to add a sophisticated aesthetic to the seating areas of Lexington Social House.

Stone bar areas

A custom stone front and back bar were designed and installed for the interior and exterior of the upscale Hollywood club.

Idea Central

Fostering the creative process
at the design center.

Minds run free and inspiration never runs dry at Idea Central. Whether you have initial thoughts, sketches on a tablet or even a napkin, this is the place where your "Do you think we can?" ideas become a reality.

Innovation Table

See your vision in the form of large format plans, life size room renderings and more at our larger than life Innovation Table.

Samples and Products

As a proud partner of premier materials companies like Dupont™ Corian® and The Stone Collection, we offer thousands of options for your custom solution. You can also sample the widest variety of products from Sloan® to elevate your design.

Design and Develop

Our design space was built specifically for designers and architects to become one, and work side-by-side, literally and figuratively, to provide their customer with the ultimate in form and function.

Realization Central

Building products with modern tools and processes.

This is where the rubber meets the road or the Corian® meets the steel. It's when expert craftsmanship, proprietary tools and superior materials turn plans into physical masterpieces.

Measurement and Carpentry

From the most minute measurements to angles cut with a 5-axis waterjet, your products will be built as precise as humanly (or mechanically) possible.

Craft and Assemble

After pieces are cut and parts built, our team hand assembles the final products for the finishing touch, ready to ship for your dream installation.

Packaging and Logistics

With the amount of time and effort that goes into each piece, there is simply no way we can afford to cut corners on transport. That is why we custom package and crate everything we build.
